

Elevate safety and efficiency at distribution centers

The power of combined technology: video + voice

MOTOROLA SOLUTIONS

Benefits of combining video and voice

In the fast-paced world of distribution centers, where efficiency and safety are paramount, technology plays a crucial role in optimizing operations and protecting your workforce. By combining the power of two-way radio communication with body camera video capabilities, you can empower your frontline workers and enhance your overall operations.

Increased Productivity

Instant communication and video documentation streamline workflows, minimize downtime and improve accountability

Improved Safety

When a threat is detected on premises, discreetly activate your body camera and alert the security team at the same time with your two-way radio.

Enhanced Situational Awareness

De-escalate incidents by live-streaming video on your body camera and simultaneously sharing information to remote colleagues via your two-way radio.

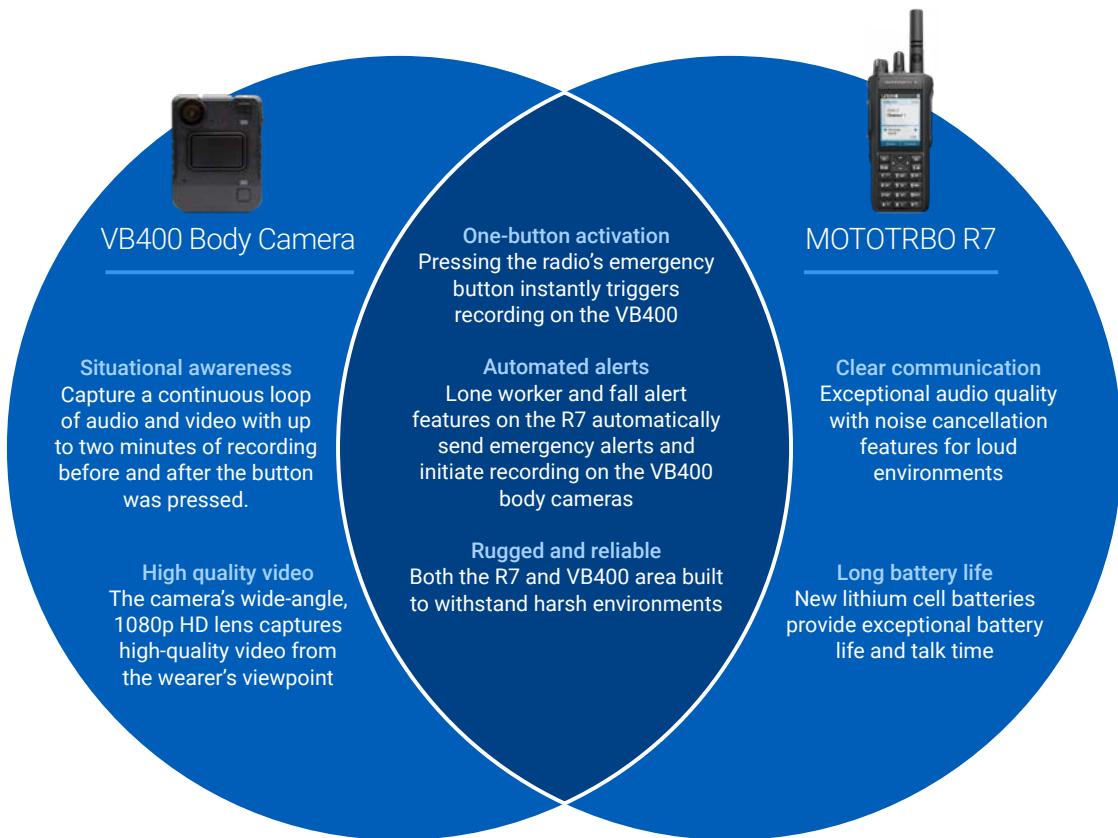

Reduced Risk and Liability

Clear video and audio records protect your business from false claims and disputes, mitigating risk and potential legal issues

Powerful alone. Game-changing together.

Key features of combining the MOTOTRBO R7 Two-Way Radio and VB400 Body Camera

At Motorola Solutions, we build the best possible technologies across every part of the safety and security ecosystem to help protect people, property and places. We're connecting technologies and people, enabling a new kind of safety.
