Drowning in invoices and inefficiency?

It's time to fight back.

Teams spend hours reconciling spreadsheets, verifying entries, and managing last-minute closings. The result? Delayed payments, rising costs, and employee fatigue.

UiPath agentic automation shifts the narrative. Procure-to-pay moves from a reactive process to a proactive advantage. Invoices are captured, matched, and approved with speed and accuracy, while people step in only where judgment is needed.

Procurement no longer means paperwork; it's now strategic, scalable, and seamlessly intelligent. Across industries, organizations are proving what's possible: faster closings, stronger supplier relationships, and millions saved through automation. What follows are their stories, real examples of how agentic automation turns procure-to-pay data into decisions, and decisions into measurable results.

MANUFACTURING

Automation fuels savings—\$6 million and counting

“AI-powered automation helps us spend less time looking inward—and more where it’s going to matter.”

Ramnath Natarajan,
Director of Global Intelligent Automation & Integration, Johnson Controls

Video case study

Johnson Controls automated accounts payable (AP) processes, replacing 200,000 manual monthly transactions with AI accuracy. With

UiPath Document Understanding™,

they increased accuracy to

89%,

cut third-party vendor costs by

75%,

and saved

\$6M

in AP while achieving

\$10 million

in enterprise-wide value.

MANUFACTURING

Beko

Finance automation delivers a step change in customer satisfaction

Beko Corporate, Europe's second-largest home appliances manufacturer, has automated electronic invoicing across its global finance network. With optical character recognition (OCR) and AI form recognition, eight invoice types were grouped and processed automatically. This reduced reading time to

5–7 seconds per invoice.

The transformation boosted efficiency equivalent to

19 full-time roles

and drove team satisfaction to

87.4% net promoter score (NPS).

FINANCIAL SERVICES

Simplifying complexity with AI accuracy

"I anticipate our imminent exploration of agentic automation, a sophisticated tool embodying human-like decision making. Crucially, it can streamline complex business and customer related decisions, suggesting promising solutions to current problems. The future seems bright with the introduction of agentic automation with human-in-the-loop capability."

Srinivas Nagarajan,
VP, Product & Operations, Deluxe

Deluxe transformed document-heavy finance workflows with UiPath, automating contract extraction, pricing, and invoice processing. They achieved a

99% faster time to value,

saved

800+ hours per pricing case,

and analyzed

11K emails in days.

Automation through UiPath AI Center and UiPath Document Understanding™ accelerated ROI, while improving precision in complex financial operations.

Video case study

CONSTRUCTION & AUTOMOTIVE SERVICES

**Driving growth with
finance automation**

Classic Collision automated invoice and statement processing across 300 locations, achieving

\$4.8 million ROI in 18 months, \$107K monthly cost avoidance,

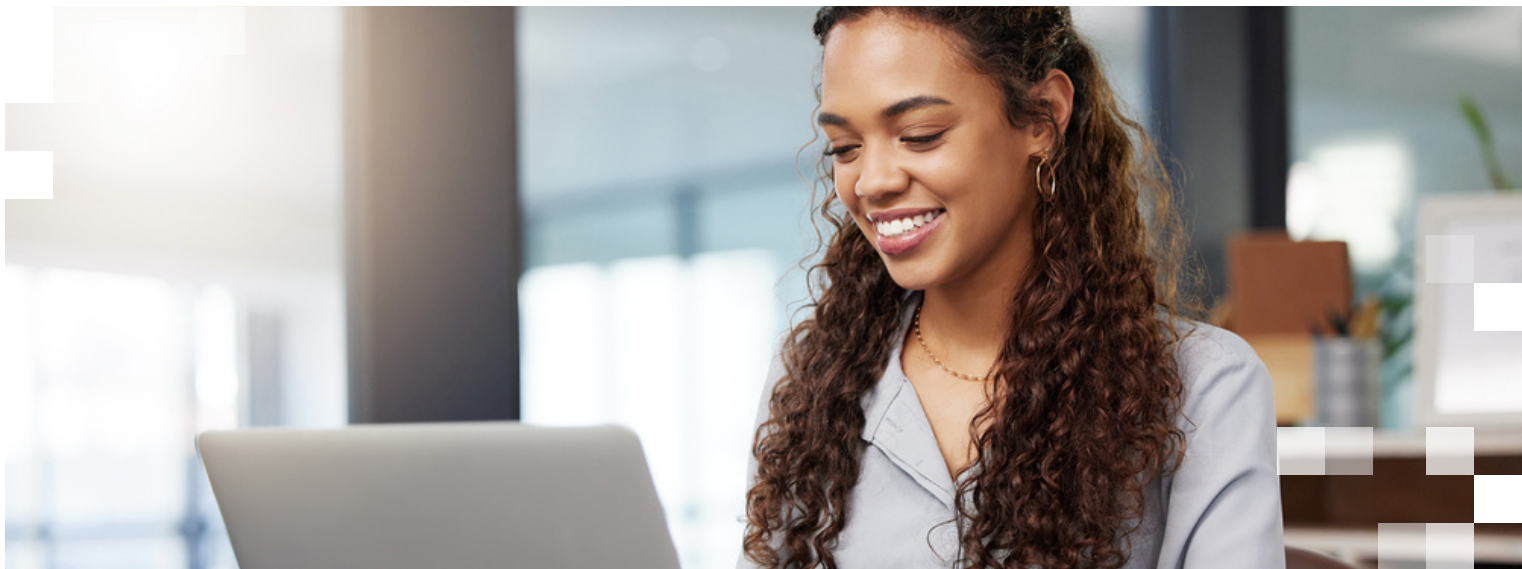

and

15K hours saved per month.

Starting in finance and accounting, the automation scaled enterprise-wide, cutting reconciliation exceptions by

70%

and supporting sustainability and environmental, social, and governance (ESG) initiatives.

ENERGY & UTILITIES

Powering financial efficiency with AI

Enerjisa automated classification for

70+ types of invoices,

reducing manual processing by

75%,

achieving

>99% process success rate,

and saving

\$350K annually.

By integrating UiPath Document Understanding™ and UiPath Orchestrator, they freed

12 employees

from repetitive AP tasks and accelerated enterprise resource planning (ERP) data entry.

ENERGY & UTILITIES

Achieving AU\$500K in savings through remittance automation

Origin Energy,

one of Australia's largest energy retailers, automated remittance advice processing for

60K documents annually

using

UiPath AI Center

and custom machine learning (ML) models. The result:

10K hours saved, 96% data accuracy, and AU\$500K in savings each year.

Automation now processes payment confirmations in under

40 seconds per remittance,

with manual effort down by

40%.

IT TECHNOLOGY

Scaling global finance operations through intelligent automation

“We have seen the value of the partnership with UiPath. The UiPath ecosystem is so useful, and there is constant sharing of knowledge and willingness to work together. The journey has been great.”

Kanishka Kumar Sinha,
Global Head, Hyperautomation
Professional Services

INGRAM MICRO

Ingram Micro automated

250K AP documents annually

across

32 vendors and 4 countries,
saving

\$8.5M

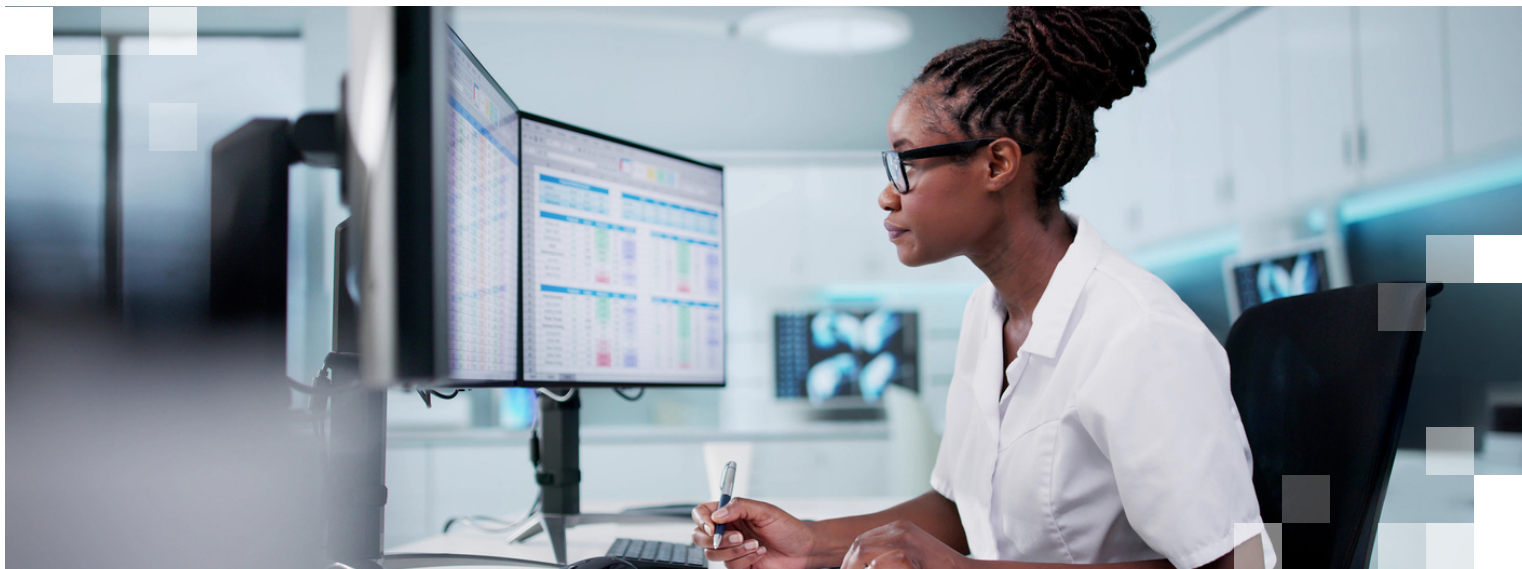

and eliminating

80% of manual tasks.

By embedding UiPath Document Understanding™ in SAP workflows, they standardized formats, ensured compliance, and reclaimed

7,000 hours per year

from manual invoice validation.

HEALTHCARE

Speeding payments, freeing people

VDH automated invoice processing,
cutting approval time from

10 days to 2.5 days,
with

**85% of invoices processed
within the first two days**

each month.

By using UiPath to read and match invoices and timesheets, the finance team accelerated payment to contractors while ensuring compliance with public service level agreements (SLAs).

HEALTHCARE

Transforming healthcare finance through automation

“Agentic automation is certainly on our agenda for facilitating two key use cases—device processing and medical summarization. With agentic automation, we can potentially enhance our device processing capabilities. Similarly, we intend to use agentic automation to efficiently manage extensive medical records via summarization.”

Satendra Shukla,
Vice President, Payer Configuration & Intelligent
Automation, CareSource

CareSource

digitized and automated finance
and claims documentation using

UiPath Document Understanding™.

With

**90% of invoices processed
automatically,**

manual labor dropped

50%,

and accuracy reached

98.5%.

Automation eliminated bottlenecks
across six departments, accelerating
processing for

3,000+ daily documents

and dramatically improving service
for members and providers.

LIFE SCIENCES

Precision and productivity in procurement

"Something we really like
about the UiPath Document
Understanding™ technology
is that the more we use it,
the better it gets."

Senior Leader,
Smart automation – Global GBS,
ThermoFisher Scientific

ThermoFisher SCIENTIFIC

Thermo Fisher automated processing of
270K invoices annually,
saving
10.6K hours over two years
and expanding to another
180K invoices.

With UiPath Document Understanding™
and UiPath AI Center, invoice layouts are
analyzed and validated through UiPath
Action Center, reducing rework, improving
turnaround, and enhancing accuracy
across global finance operations.

CONCLUSION

Procure-to-pay used to mean process. Now, it means precision.

Every invoice, approval, and reconciliation becomes an intelligent, connected flow. No chasing, no waiting, no manual grind—just speed, accuracy, and control.

Agentic automation gives procure-to-pay a new rhythm. AI agents read, match, and validate in real time, while finance teams lead with insight, not data entry. The result: faster closings, stronger supplier trust, and millions unlocked from inefficiency.

This isn't just automation. It's how procurement thinks, acts, and wins in the age of intelligence.
